LED MIRROR AND CABINET MIRROR

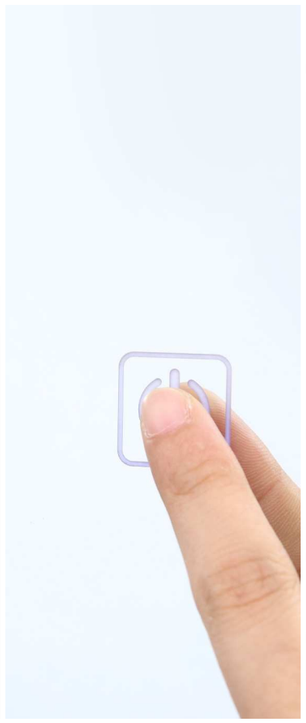

EXCLUSIVE ADVANTAGES

SUNRAY EFFECT

LED bulbs which recreate sunrays, which, alternatively, emit a warm and cold light beam.

TOUCH SENSOR

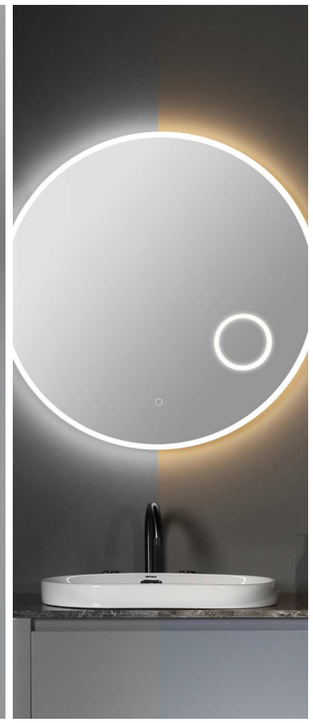

The illuminated touch sensor permits to switch on and off the mirror with the simple touch of a finger even in the dark.

SHELF

Practical shelf that, thanks to its depth, is perfect to display your precious make-up and beauty accessories.

WARM/COLD LIGHT

The backlit mirrors have integrated dual illumination, warm and cold, and the passage from warm light to cold light, and viceversa, is obtained by keeping your finger on the touch sensor for a few seconds.

ENERGY SAVING-LEDS

We employ the latest lighting technology and use the newest generation of LED lights which offer the best performance at the lowest possible energy consumption in accordance with the global effort to respect precious resources.

SAFETY

Our mirrors have a thickness of 5mm and a special safety-film-backing which, in case of accidental breakage, avoids the glass pieces to crumble and the formation of glass slivers. This is a very important safety feature, especially for children, who are usually more exposed to this type of risk.

EASY TO HANG

Quick and easy installation using our "Ô Hanging" system which permits the mirrors to be hung smoothly.

DEFOGGER

The heating element attached to the backside of the mirror prevents it from becoming foggy with vapour, typically present in a bathroom environment. The defogger function offers the best solution possible to say goodbye to foggy mirrors and hazy reflections.

CERTIFICATIONS
